

## Service Release Notes – Milestone XProtect Corporate 2.0b

It is with great pleasure that Milestone Systems as of November 13<sup>th</sup> is shipping the service release of

### Milestone XProtect Corporate 2.0b

#### Features, changes and issues solved

##### XProtect Corporate 2.0b

- **Release date**
  - November 13<sup>th</sup> 2008
- **Device pack**
  - “Video Device Driver” pack version 3.9 is shipping with XProtect Corporate 2.0b.
  - For information regarding supported devices, please see the device pack release notes or visit Milestone Supported Hardware web page.
- **Included modules**
  - Download Manager 1.1
  - Smart Client version 3.6c
  - Remote Client 3.5d
- **Supported languages**
  - Manager and built-in help system: English
  - Smart Client: English, German, French, Spanish, Italian, Danish, Japanese, Simplified Chinese, Dutch, Polish, Russian, Arabic, Czech, Swedish and Korean.
- **What’s new compared to XProtect Corporate 2.0a**
  - **Features**
    - Vista Business, Enterprise and Ultimate and Windows Server 2008, 32-bit is now supported.
    - H.264 support. Please see the device pack release notes or visit Milestone Supported Cameras web page for information about supported devices.
    - IPv6 is now supported. Please see the device pack release notes or visit Milestone Supported Cameras web page for information about supported devices.
    - Download Manager is a new feature for managing which clients and other tools (SC and RC language versions, SC language packs, plugins) users should be able to access from welcome page on server. Please see the manual for details. Note: The Download Manager doesn’t support the Transact plug-in 2.5a (and earlier) and the LPR plug-in 1.5a (and earlier).
    - Server-Side Installers for 1) SC language versions 2) RC language versions and 3) Language packs, let admin place e.g. an Arabic SC version on the server; that Arabic version can subsequently be made available on the welcome page through the Download Manager.
    - It is now possible to mark a preset on a device as the default preset and make a rule that will make the device go to the default preset.
  - **Changes**
    - The Windows Component Update installation step has been removed as it is not needed any more.
    - Value Adding Servers, like Transact Servers, are now entered in a separate dialog.
    - Response time in the Management Client has been improved on large installations.
    - Smart Client, Remote Client and Management Client login times have been improved on large installations.
    - PTZ has been improved giving a better and more fluent joystick movement.
    - Performance of user synchronization with Active Directories has been improved.

- **Issues solved**
    - Fixed an issue where the Management Client would throw an error when trying to authenticate a Recording Server, when running the Management Client on a non-English OS.
    - When upgrading from 1.5 to 2.0, the database upgrade would fail if the database password contained a semicolon. This has been fixed.
    - Camera shortcut numbers were missing in the systeminfo.xml file. This has now been added.
    - Fixed an error in the SQL Express Server installation that could cause the installation to fail on a non-English OS.
    - Fixed an issue in the Recording Server where it could write to a wrong media database if an old database directory existed.
    - Fixed a memory leak in the Management Client when switching between Recording Servers.
  - **What's new compared to Smart Client 3.6a**
    - **Features**
      - H.264 support. Please see the device pack release notes or visit Milestone Supported Cameras web page for information about supported devices.
      - IPv6 support. Please see the device pack release notes or visit Milestone Supported Cameras web page for information about supported devices.
    - **Changes**
      - PTZ has been improved giving a smoother movement. Joystick dead zones, zones where the joystick will not move, are now configurable in the joystick menu.
    - **Issues solved**
      - Fixed an issue when running the Smart Client with command line options.
      - Fixed an issue where the last used view was not restored if the Smart Client was not closed correctly.
      - An issue where auto focus didn't work on all cameras has now been fixed.
  - **What's new compared to Remote Client 3.5c**
    - **Features**
      - H.264 support. Please see the device pack release notes or visit Milestone Supported Cameras web page for information about supported devices.
- 

## Installation/Upgrade Guide

### Updating from XProtect Corporate 1.5x and 2.0a

**IMPORTANT:**

Do **not** uninstall the Milestone XProtect Database Server if you plan to reuse the configuration

---

- Shut down all programs and uninstall the XProtect Corporate 1.5/2.0 components from the Control panel – Add/Remove programs.
- Start the installation program, and proceed as guided by the installation wizard.

### Installation/New Installation

- Start the installation program, and proceed as guided by the installation wizard.

## Downloads and Documentation

The Milestone XProtect Corporate 2.0b software, the Release Notes, the User's and the Administrator's manuals are all available for download from the XPCO 2.0b Downloads section of our website.

Best regards,

The Milestone Team
